

## HTJ SITE SUPERVISION BUILDING

---

The purpose of site supervision is to ensure the contractual compliance of the contractors' work performance. Supervision material consists of plans, specifications, contracts and other documents created during the project. Technical supervision targets all contractor activities on the site.

Professional and systematic supervision ensures the quality of the desired end result.

Site supervision is carried out according to

- the building construction site supervision task list (RT 16-10746),
- Ground and water construction site supervision task list (RT 16-10466),
- building technical work supervision task list (RT 16-10747) and a separate supervision plan.

The supervision duties of a site supervisor

- General procedures
- Time supervision
- Technical supervision
- Financial supervision
- Documenting
